

NSF and ISO Validate World-Class Nutrition Manufacturing at Herbalife

Through its *Seed to Feed* program, Herbalife has made a significant investment in new laboratories, testing equipment, facilities, ingredients and scientific talent to meet the rigorous standards set by the International Organization for Standardization (ISO) and NSF International.

Why Is This Important?

With ISO accreditation and NSF certification, Members and their customers can be confident that Herbalife® products and facilities meet international standards for product quality, testing and safety. These achievements are only awarded to companies that undergo and pass rigorous facility audits and testing by these independent third parties.

In Our Quality Labs

ISO International Standard (ISO17025) accreditation means that Herbalife adheres to strict standards for the technical competency of laboratory scientific personnel, the accuracy of testing methods, the validation of equipment and more. The Mark Hughes Laboratory in Torrance, California, and the quality control laboratories at Herbalife Innovation & Manufacturing (H.I.M.) in Lake Forest, California and Winston-Salem, North Carolina meet this rigorous, internationally recognized ISO standard.

In Our H.I.M. Facilities

NSF's Good Manufacturing Practices and GMP for Sport Facility Registration certifies that registered Herbalife facilities manufacture product in accordance with the applicable current Good Manufacturing Practices (cGMP) maintain continual investment in the latest technologies and use advanced instrumentation to test all Herbalife24™ products made in the United States. In addition to five NSF-compliant contract manufacturing partner facilities in the United States, NSF-certified Herbalife facilities include H.I.M. Lake Forest and H.I.M. Winston-Salem.

In Our Nutrition Products

NSF-Certified for Sport® Product Certification program guarantees that certified Herbalife® products are formulated for safety and produced in a cGMP-compliant environment, meet label claims and are free of substances banned by leading international athletic organizations and leagues.
