

Your Kids' Nutrition Is Our Mission

The Herbalife Kids® line provides essential nutrition that includes protein, fiber and nutrients to meet growing kids' daily needs. Because it tastes great, kids will ask for it every day.

Fast Facts:

- For many children – particularly those who are quite physically active – snacks can help round out their nutritional requirements and provide as much as one fourth of their calories.
– *Healthychildren.org, 2014*
- Kids build about 90 percent of their adult bone mass by age 17, which is important for preventing osteoporosis and fractures later in life. Yet fewer than 1 in 10 girls and 1 in 4 boys ages 9 to 13 get adequate daily calcium, according to the National Institutes of Health (NIH).
– *Let's Move website, 2014*
- The way we eat has changed considerably throughout the last 30 years. Children are eating more and differently than they did before. There are bigger portions offered and consumed and a greater reliance on snack foods and sugary beverages. Whereas in the past, sugar consumption was a relatively minor part of our diet, now almost all processed foods (including staples such as peanut butter, breakfast cereal and canned foods) add sugar.
– *Obesity Action Coalition, 2014*

Member Reference Guide

Benefits:
